7 <http://info.acm.org/crossroads/xrds9-3/french.html>

Size: 23.54KB MIME type: text/html

The computer's role is, of course, everywhere: in the pitch analysis program (Praat), in generating prosodically marked phonological sentences from a grammar, in producing the sound output (speech) from the generated output, and in the programming and modifications involved with the natural language generation system. All declarative sentences are characterized by a start at or near pitch level 1 (normal resting voice) followed by a rise near the center of the sentence preceded by a drop to ...

Evans: Evaluation of Automatically Identified Index Terms for Browsing Electronic Documents.

9 [ch01](#)

Size: 272.33KB MIME type: application/pdf

Deborah Mayhew Interfaces User interfaces (hereafter, mostly just interfaces" with various specifying adjectives, like voice" and graphic) are the media by which people interact with digital systems. The explication of interface" in the jacket blurb to Steven Johnson's Interface Culture Graphic interfaces are often just called interfaces" these days, so much have they become the default, but also GUIs (Graphical User Interfaces). Indeed, designing conversational voice interfaces needs to ...
